**Fall Protection &
Rescue Specialists**

COMPANY MISSION

We, at "Safety Connection, Inc.", strive to meet the growing needs of the various industries who work at heights. Our team has invaluable indepth knowledge and experience of Fall Protection and Rescue equipment itself, thereby enabling us to offer our services as Fall Protection & Rescue Consultants and trainers. We train and consult worldwide, and have expanded our business to include

Ladder Safety Systems and Horizontal Lifeline installation. Our past and present Consultation/ Training customer list speaks volumes.

"Safety Connection, Inc." can provide services either at your jobsite, or at our

training facility, which consists of a 4,000 sq. ft. area. Not only do students of our classes gain hands-on knowledge of how to utilize fall protection equipment, but they are also tested in order to be certified, in our classroom environment. During the classroom phase, we utilize a state-of-the-art laptop computer and an LCD projection system, which allows us to present Power Point presentations to our students. "Certificates of Completion" are issued to students who attend our classes.

At our training facility, we have erected unique exercise structures, such as scaffolding, towers, confined space, etc., which will help students

obtain knowledge of various Fall Protection aspects. These aspects include, but are not limited to: establishing definitive parts of Personal Fall Arrest System (including body supports, lanyards, self-

retracting lifelines, rope grabs, and anchorage components), anchorage points (determination suitability), compatibility between components, arresting forces (limits, deceleration distances), and actual hands-on exercise of rescue techniques. We also cover the usage of equipment, including: ladder climbing system, horizontal lifeline systems, rescue and retrieval systems, rope grab systems, self-retracting lifelines, and care/maintenance of fall protection equipment.

WHY SAFETY CONNECTION?

- We have 14 years of experience.
- We utilize state of the art equipment.
- We not only teach in a classroom, but we include hands-on activities in all of our training classes.
- We teach approximately 5000 students per year in various industries.
- We have written our own Fall Protection Manual, which is given out during class.
- We have an extensive line of companies which we have provided training, including OSHA and MMS. The list can be found at www.safetyconnection.com.
